User Guide

Stellar Phoenix

SQL Database Repair 5.0

Overview

Stellar Phoenix SQL Database Repair software is an easy to use application designed to repair corrupt or damaged Microsoft SQL Server database (MDF) files in a safe and non-destructive manner. It uses powerful algorithms to perform thorough scan of MDF file so as to recover as much data as possible. The software never deletes or modifies original data and even heavily damaged files can be optimally repaired and restored.

Microsoft SQL server system is a full-fledged relational database management system (RDBMS) that offers an exclusive variety of a number of administrative tools for database development, maintenance, and administration. Microsoft SQL Server database files (MDF) can get damaged or corrupted due to a number of reasons such as virus attack, unexpected system shutdown, media read error, and so on.

Key Features

- Support for MS SQL Server 2012, MS SQL Server 2008 R2, 2008, 2008 (64 bit), 2008 Express, MS SQL Server 2005, 2005 (64 bit), 2005 Express, MS SQL Server 2000, 2000 (64 bit), 7.0 and mixed formats.
- Searches MDF files in the computer.
- Displays preview of recoverable database objects.
- Allows finding of object name in tree view.
- Supports Sequence Objects in MS SQL Server 2012.
- Supports MS SQL Server ROW Compressed data.
- Supports MS SQL Server PAGE Compressed data.
- Supports Standard Compression Scheme for Unicode (SCSU) in SQL Server 2008 R2.
- Recovers Column Row GUID COL Property.
- Recovers Sp_addextended Property.
- Saves non-recovered queries, views, stored procedures, etc. in a text file.
- Support for automatic recreation of a new database having all the recovered database items.
- Support for large SQL Server MDF files for all versions.
- Support for XML data types.
- Support for XML indexes.
- Support for SQL Server 2008 filestream data types.

- Support for SQL Server 2008 sparse columns.
- Support for SQL Server 2008 columns set property.
- Support for separate log report after scanning database.
- Support for Sorted tables in tree view and generates sorted log report.
- Support for fast scanning algorithms.
- Support for total row count detail in each table for all versions.
- Recovery of Tables, Triggers, and Views.
- Recovery of Collations.
- Recovery of Stored Procedure, Synonyms, and Functions.
- Recovers of Defaults and Default constraints.
- Recovery of Primary Keys, Foreign Keys, Unique Keys, and Identity.
- Recovery of Indexes (Clustered, Non - Clustered indexes).
- Recovery of Check constraints, User Defined Data Types, and Null / Not null.
- Recovery of Predefined defaults, default values, and Rules.
- Compatible with Windows 8 / Server 2012 / Windows 7 / Vista / XP / Server 2008 / Server 2003.

What's New in This Version?

New features in Stellar Phoenix SQL Database Repair include:

- Enhanced Graphical User Interface (GUI) with Ribbon Control.
- Maximized chances of repair in corruption cases.
- Ability to reconnect in case of disconnection during repair process.
- Improved exception handling.

Installation Procedure

Before beginning the installation procedure, make sure that the computer meets the minimum system requirements.

Minimum System Requirement

Operating system: Server 2012 / Windows 8 / Windows 7 / Vista / XP / Server 2008 / Server 2003

Hard Disk: At least 50 MB of free disk space

RAM: 1 GB minimum (2 GB recommended)

MS SQL Server: MS SQL Server 2012, MS SQL Server 2008 R2, 2008, 2008 (64 bit), 2008 Express, MS SQL Server 2005, 2005 (64 bit), 2005 Express, MS SQL Server 2000, 2000 (64 bit), 7.0 and mixed formats.

To install the software, follow the steps:

1. Double-click **StellarPhoenixSQLDatabaseRepair.exe**. **Setup** dialog box is displayed.

2. Click **Next** to continue. **License Agreement** dialog box is displayed.

3. Select **I accept the Agreement** option. Click **Next**.

4. Specify the location where the installation files are to be stored. Click **Next**.

5. Select the folder where the files are to be stored. A default folder is suggested in the box. Click **Browse** to select a different location. Click **Next**.

6. In the **Select Additional Tasks** dialog box, select check boxes as per your choice. Click **Next**.

7. Review your selections. Click **Back** if you want to make any change. Click **Install** to start installation. The Installing window shows the installation process.

8. After completion of the process, **Completing the Stellar Phoenix SQL Database Repair Setup Wizard** window opens. Click **Finish**.

Note: *Clear* ***Launch Stellar Phoenix SQL Database Repair*** *check box to prevent the software from launching automatically.*

Launching the Software

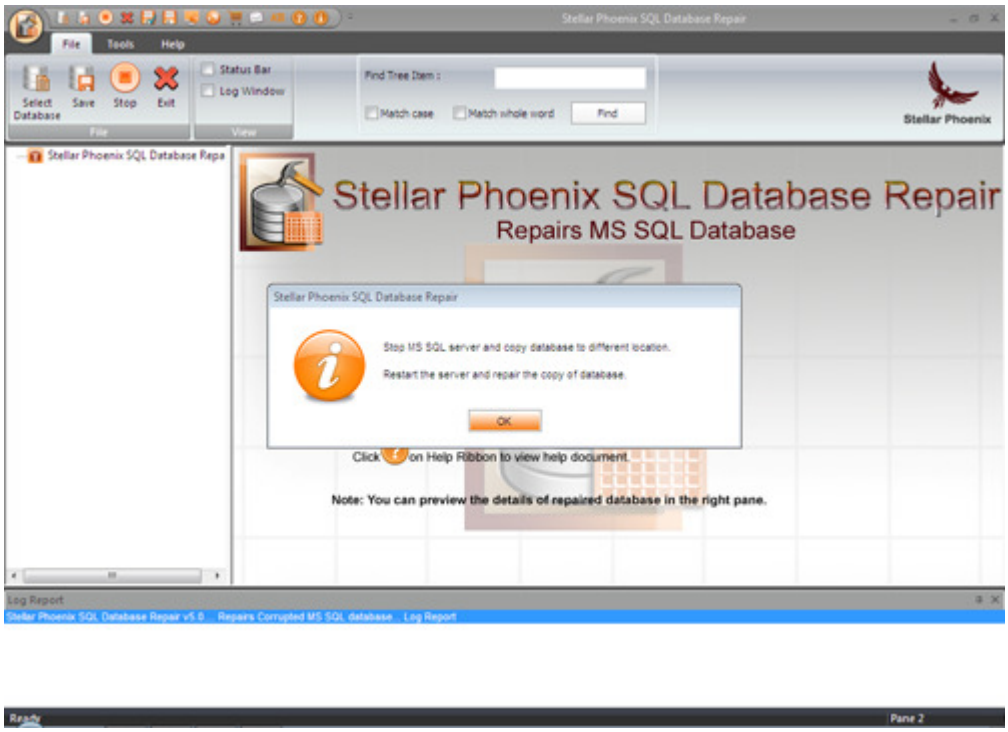
You can use either of the following methods to start **Stellar Phoenix SQL Database Repair**:

- Click **Start** -> **Programs** -> **Stellar Phoenix SQL Database Repair** -> **Stellar Phoenix SQL Database Repair**
- Double click **Stellar Phoenix SQL Database Repair** icon on the desktop.
- Click **Stellar Phoenix SQL Database Repair** icon in Quick Launch.

User Interface

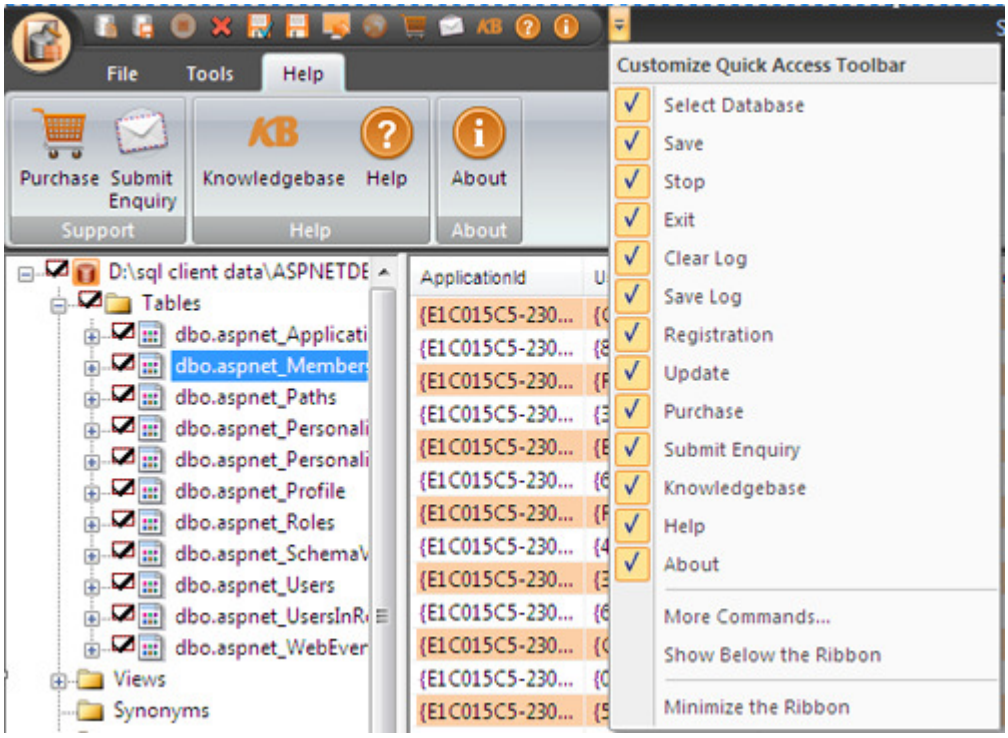
Stellar Phoenix SQL Database Repair software has a very easy to use Graphical User Interface. The user interface contains features required for complete recovery of corrupt MS SQL Server (MDF) files.

After launching the program, you will see the main user interface as shown below:

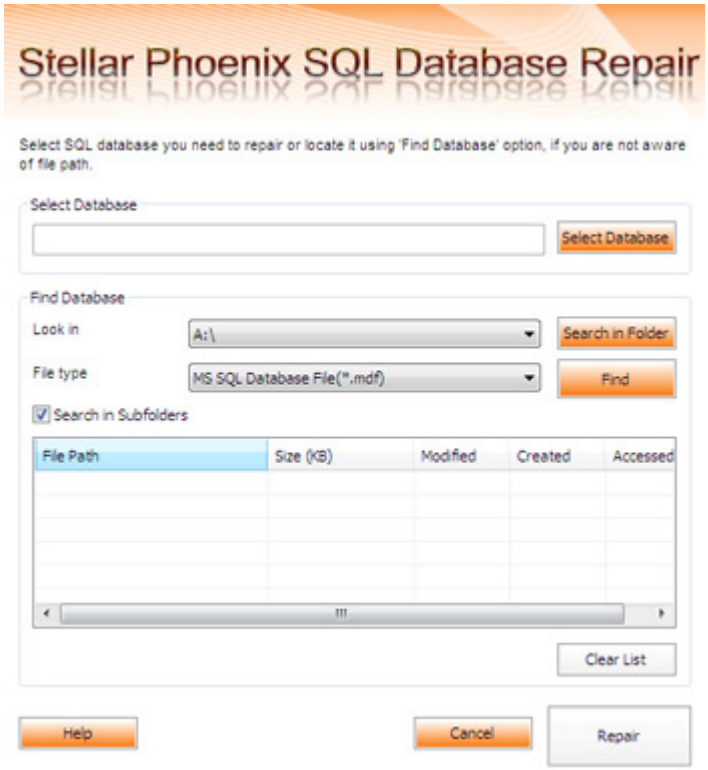


The user interface contains menus and buttons that lets you access various features of the software with ease.

You can also access various features of **Stellar Phoenix SQL Database Repair** via the **Quick Access Toolbar**, which appears at the top of the user interface, and can be customized as per your requirement.



When you start **Stellar Phoenix SQL Database Repair**, the **Select SQL database** dialog box opens as shown below:



To select a database, click on **Select Database** button. Select the MDF file that needs to be repaired and then click **Repair** to start the repairing process.

Stellar Phoenix SQL Database Repair also allows you to search for MDF file that needs to be repaired, in case you don't know it's location. In **Find Database** section, select the drive in which you want to search for the MDF file and then Click **Find** to start searching for files.

Note: Select SQL database *dialog box can also be opened by selecting* ***Select database*** *in the File menu.*

Ordering the Software

Click http://www.stellarinfo.com/sql-recovery.htm to know more about **Stellar Phoenix SQL Database Repair.**

To purchase the software online, please visit http://www.stellarinfo.com/database-recovery/sql-recovery/buy-now.php

Alternatively, click on **Purchase** icon in **Help Menu** on **Menu Bar** to purchase the software online.

Select either of the methods given above to purchase the software.

Once the order is confirmed, a serial number will be sent to you through e-mail, which would be required to activate the software.

Registering the Software

You can visit http://www.stellarinfo.com/sql-recovery.htm to download demo version of **Stellar Phoenix SQL Database Repair** software. The demo version is just for evaluation purposes and you must eventually register the software to use its full functionality. Once you purchase the software, you will receive a key using which you can register the software.

You can register the software using any of the following methods:

- Online Registration

  After purchasing the software, a serial number will be sent via email, which is required to register the software. You need to enter the serial number, which is then verified by a license server and on verification, the software is registered.

- Manual Registration

  To register the software manually, you will need to generate a PHX_REG.txt file and mail it to support@stellarinfo.com. After verification of the serial number and purchase details, the site key, which is required to register the software manually, will be sent to your email address.

Note: *If the software is downloaded from http://www.stellarinfo.com/database-recovery/sql-recovery/buy-now.php (i.e., ESD version), it must be registered using Serial Number (received through email after purchasing the product) to use all the features of the software.*

If the software is installed using the product installation CD (i.e., BOX version), hardware lock, that is available with the software kit, is mandatory for the functioning of the software.

Online Registration

To register the software online:

1. Launch demo version of **Stellar Phoenix SQL Database Repair** software.
2. In **Tools Menu** on **Menu Bar**, Click **Register**.
3. In **Registration Option** dialog box, select **I have the registration key**.
4. Select **Online Registration**. Click **OK**. A warning will appear, click **OK** to continue.
5. In **Welcome to Stellar Phoenix - Electronic Registration Wizard**, click **Next**.
6. Type the serial number (received through email after purchasing the product) in serial number field. Click **Next**.
7. The software would automatically communicate with the license server. After the registration is done, click **Finish** to complete the registration process.

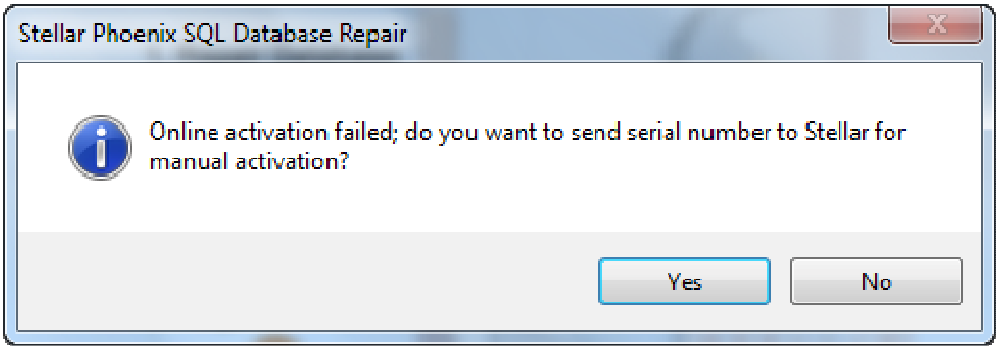
Registration Screen

Note: *You can generate PHX_REG.txt file manually via online activation. View Manual Registration to perform the process of generating PHX_REG.txt file.*

Manual Registration

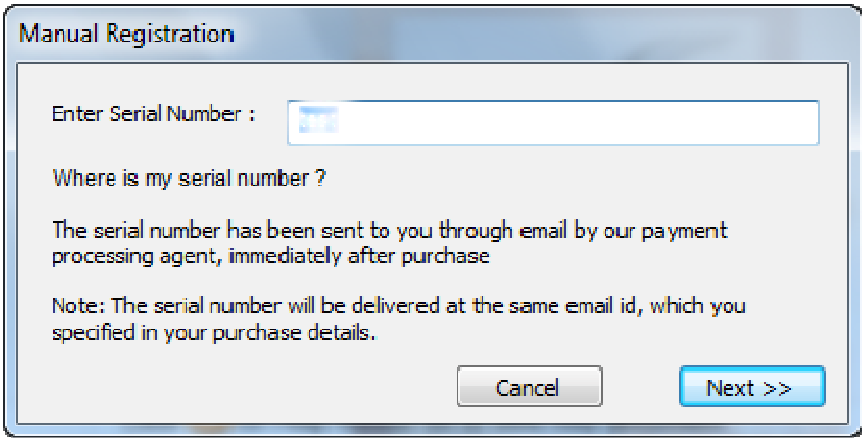
To register the software manually:

1. Launch the demo version of **Stellar Phoenix SQL Database Repair**.
2. In **Tools Menu** on **Menu Bar**, Click **Register**.
3. In **Registration Option** dialog box, select **I have the registration key**.
4. Select **Online Registration**. Click **OK**. A warning will appear, click **OK** to continue.
5. In **Welcome to Stellar Phoenix - Electronic Software Registration** wizard, click **Cancel**.
6. Stellar Phoenix SQL Database Repair dialog box will open, click **Yes**.



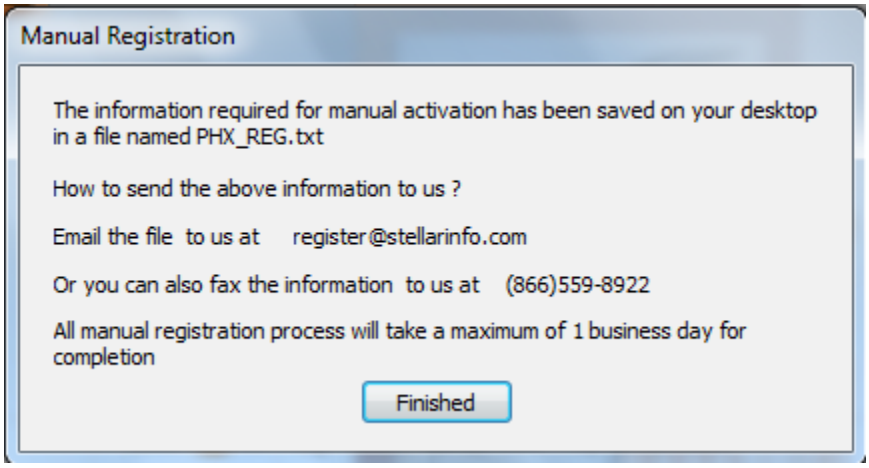
Stellar Phoenix SQL Database Repair
Online activation failed; do you want to send serial number to Stellar for manual activation?
Yes
No

7. In **Manual Registration** dialog box, enter the serial number that you receive once you purchase the software. Click **Next**.



Manual Registration
Enter Serial Number :
Where is my serial number ?
The serial number has been sent to you through email by our payment processing agent, immediately after purchase
Note: The serial number will be delivered at the same email id, which you specified in your purchase details.
Cancel
Next >>

8. A file named PHX_REG.txt is created on your desktop. Email it to support@stellarinfo.com. Click **Finished**.



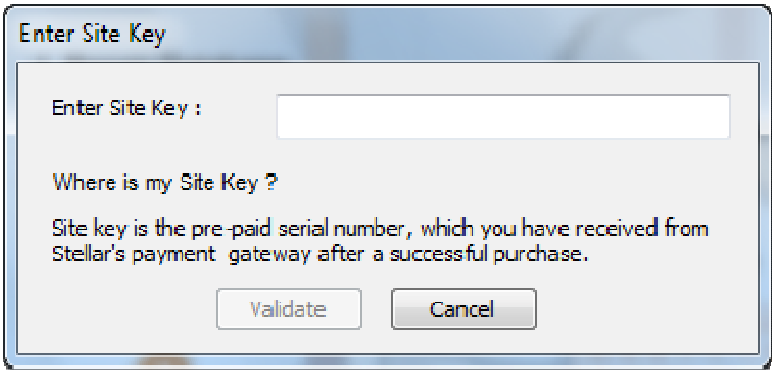
Manual Registration
The information required for manual activation has been saved on your desktop in a file named PHX_REG.txt
How to send the above information to us ?
Email the file to us at register@stellarinfo.com
Or you can also fax the information to us at (866)559-8922
All manual registration process will take a maximum of 1 business day for completion
Finished

9. After verifying the purchase details, you will receive the site key, which is required to register the software manually.

10. After receiving the Site Key, open **Stellar Phoenix SQL Database Repair**. In **Registration Option** dialog box, select **I have the registration key**.

11. Select **Manual Registration** and Click **OK**.

12. Enter the Site Key in **Enter Site Key** dialog box. Click **Validate**.



Enter Site Key
Enter Site Key :
Where is my Site Key ?
Site key is the pre-paid serial number, which you have received from Stellar's payment gateway after a successful purchase.
Validate
Cancel

Note: *The site key is delivered to the email address through which the serial number is sent.*

Updating the Software

Stellar releases periodical software updates for **Stellar Phoenix SQL Database Repair** software. You can update the software to keep it up-to-date. These updates can add a new functionality, feature, service, or any other information that can improve the software. Update option of the application is capable of checking for latest updates. This will check for both latest minor and major versions available online. You can easily download minor version through the update wizard. However, the major version, if available, has to be purchased. While updating the software, it's recommended to close all the running programs. Note that demo version of the software cannot be updated.

To update Stellar Phoenix SQL Database Repair:

1. In **Tools Menu**, Click **Update**.

2. **Stellar Phoenix Update Wizard** window opens. Click **Next**. The wizard will search for latest updates, and if it finds any new updates, a window will pop up indicating its availability.

3. Click **Next** and the software will download the files from the update server. When the process is complete, the software will upgrade to the latest version.

Live Update may not happen due to following reasons:

- Internet connection failure
- Updates are not available
- Unable to download configuration files
- Unable to locate updated files or version
- Unable to locate executable file

Note: If a major version is available, you need to purchase the software in order to upgrade it.

Stellar Support

Our Technical Support professionals will give solutions for all your queries related to Stellar products.

You can either call us or go online to our support section at http://stellarinfo.com/support/

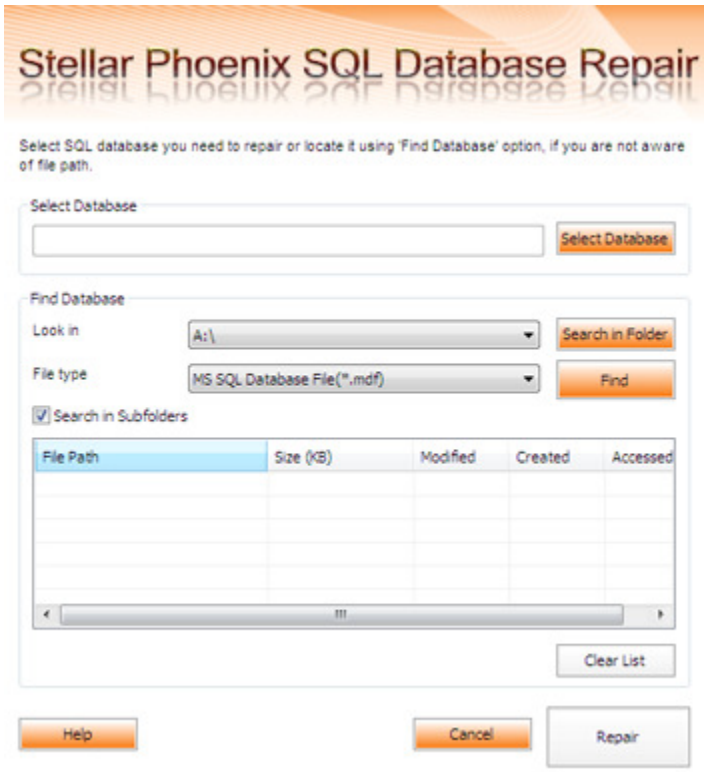
Select MS SQL Database (MDF) File

To select MDF file:

1. Open **Select SQL Database** dialog box by clicking **Select Database** button on the **Quick Access Toolbar** or by choosing **Select Database** icon from **File Menu**.



2. In **Select SQL Database** dialog box, click **Select Database** to choose the MDF file for repairing.

To find MDF File:

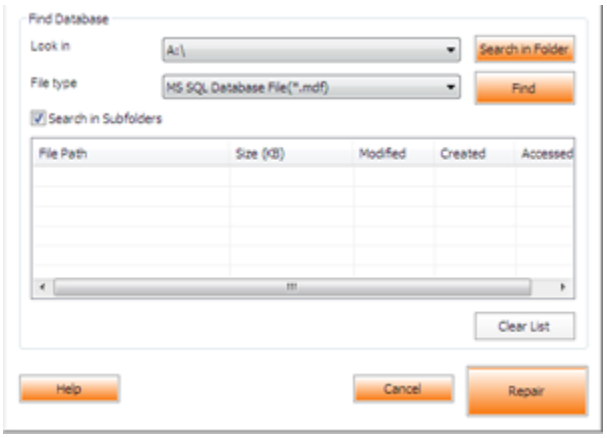
Stellar Phoenix SQL Database Repair allows you to search for MS SQL database (MDF) files in your computer. Using **Find Database** option, you can search for MS SQL Database files in your computer's drives, folders and sub folders. However, you can only select one drive at a time to search for MS SQL Database files.

To find MDF files in drives:

1. Open **Select SQL Database** dialog box by clicking **Select Database** button on the **Quick Access Toolbar** or by choosing **Select Database** icon from **File Menu**.

2. From **Look in** field under **Find Database** section, select the drive you want to search for MDF files. Click **Find**.

3. After the search is finished, a list of MS SQL Database files found in the selected drive is shown.



Find Database

To find MS SQL Database files in folders and subfolders:

1. Open **Select SQL Database** dialog box by clicking **Select Database** button on the **Quick Access Toolbar** or by choosing **Select Database** icon from **File Menu**.

2. In **Select SQL Database** dialog box, click **Search in Folder** button. **Browse for Folder** dialog box opens.

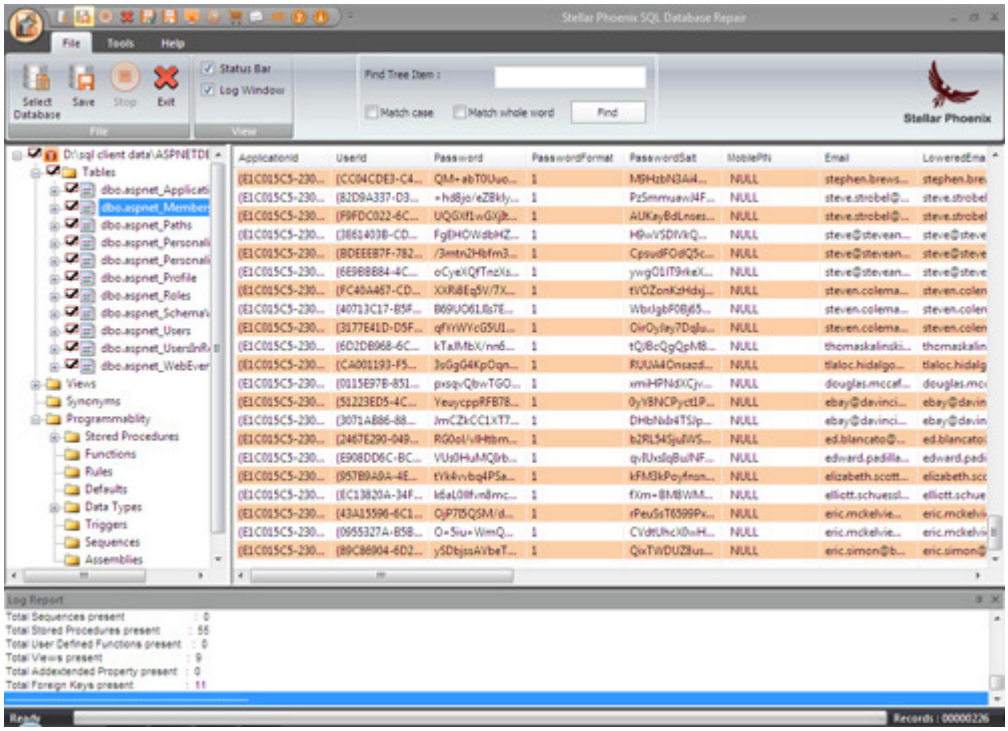
3. Select the folder in which you want to search MDF files. Click **OK**. Also, if you want to search subfolders within that folder, select **Search in Subfolders** checkbox. Click **Find.**

4. After the search is finished, a list of MS SQL Database files found in the selected drive is shown.

Note: *Click* ***Clear List*** *button to clear the search result.*

Repair and Save MDF Files

After you complete the repairing process successfully, left pane displays list of items (Table, View, Synonyms, Defaults, Data Types, etc.) in file in a tree like structure, upper right pane displays content of selected items and bottom pane shows message log as shown in the figure given below:



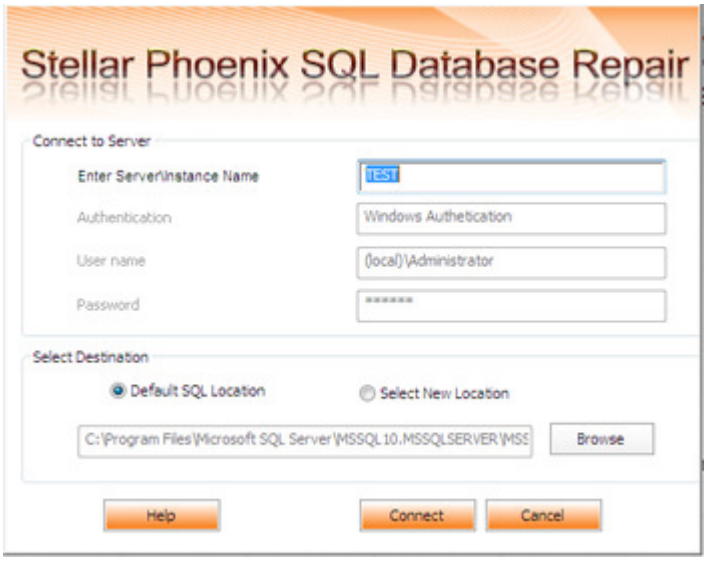
By default, all the checkboxes are selected. To preview content of an item, click on it in the tree view in left pane.

Note: *The software counts records present in the database after repairing. The time taken in counting depends on the number of records present in the database. Skip counting to speed up repair process.*

To save the repaired file:

- Select **Save** option in **File menu**. Alternatively, you can also click **Save** button on **Quick Access Toolbar**.

- Enter **Server** / **Instance Name** and select a destination for saving the repaired MDF file.

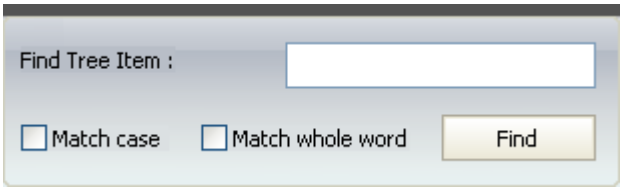


- Click **Connect** to save the repaired MS SQL Database file. A message is displayed after the process is completed successfully.

Note: *Perform repair process on the copy of database and make sure MS SQL Server is running during repair process.*

Find Specific Item In Tree

Stellar Phoenix SQL Database Repair gives option to find particular item(s) in tree view. After completion of repairing process, a search bar along with the preview window appears as shown below:



To find a particular item, enter its name in **Find Tree Item** text box and click **Find** button. If that item is present in the database, it is highlighted in tree.

To narrow down the search result, you can select **Match case** or **Match whole word** check box.

Save Log Report

With **Stellar Phoenix SQL Database Repair**, you can save the Log Report to analyze the repairing process at a later stage. You can view log of the process at the bottom of the user interface. If this pane is not visible, you can enable it by selecting the **Log Window** checkbox in **View** section of **File Menu.**

To save log report:

- From **Tools Menu**, select **Save Log**.
- In **Save As** dialog box, select the location where you want to save the log report. Click **Save**.

To clear log report:

- From **Tools Menu,** select **Clear Log**.

FAQs

1. **What does the demo version of the software do?**

   Demo version of the software only shows the preview of MDF files. To repair corrupt MDF file, you need to purchase and register the software.

2. **Why is it necessary to perform repair process on the copy of database?**

   Stellar Phoenix SQL Database Repair will not be able to run if the database is attached to MS SQL Server.

3. **Can we repair table(s) in a MDF file selectively?**

   Yes, you can recover single or multiple tables. Simply select desired table(s) in tree view and start repair process.

4. **How can Stellar Phoenix SQL Database Repair help me search for the location of MDF file in the computer?**

   You can search for MDF file in the computer using **Find Database** option of the software. For more details, please refer Select MS SQL database (MDF) File topic of the help manual.

5. **I want to locate an item in the database (MDF) file. Is there any way I can do this using the software?**

   Yes, after repairing the MDF file, the software gives you option to find items in tree view. Use Find option to locate desired item in a table.

6. **How can we view process log?**

   You can view log of the process at the bottom of the user interface. If this pane is not visible, you can enable it by selecting the **Log Window** checkbox in **View** section of **File Menu**

7. **Can we save process log?**

   Yes, **Stellar Phoenix SQL Database Repair** gives you option to save log report of the process.

   To save log report:

   - From **Tools Menu**, select **Save Log**.
   - In **Save As** dialog box, select the location where you want to save the log report. Click **Save**.

About Stellar

Stellar Information Systems Ltd. is a trusted name in the field of Data Recovery and Data Protection Software for more than a decade.

We provide the widest range of Data Recovery Products. Our range includes Data Recovery Software for almost all Operating Systems and File Systems.

Product line:

Data Recovery

A widest range of data recovery software that helps you recover your valued data lost after accidental format, virus problems, software malfunction, file/directory deletion, or even sabotage!. More Info >>

File Recovery

The most comprehensive range of file undelete and unerase software for Windows and MS office repair tools. More Info >>

Database Repair

A wide range of database repair software to help you repair corrupted Microsoft SQL Server database, Microsoft Access database, MySQL database, Oracle database, SharePoint Database, SQL Anywhere Server and Interbase database. More Info >>

Email Recovery

A wide range of mail recovery, mail repair and mail conversion applications for MS Outlook, MS Outlook Express and MS Exchange useful in instances of data loss due to damages and corruption of Email. More Info >>

Data Protection

A wide range of Prevent Data Loss, Data backup and Hard Drive Monitoring Applications to ensure complete data protection against hard drive crash. More Info >>

Data Sanitization

Data cleanup and file eraser utility can delete selected folders, groups of files, entire logical drives, System Traces & Internet traces. Once the data have been removed using Stellar Wipe - Data File eraser utility, it is beyond recovery limits of any Data Recovery Software or utility. More Info >>
